# INDEX TO AUTHORS

A

**Adelberg, Edward A.** The biosynthesis of isoleucine and valine. III. Tracer experiments with L-threonine, 431

—, **Coughlin, Carroll A.,** and **Barratt, R. W.** The biosynthesis of isoleucine and valine. II. Independence of the biosynthetic pathways in *Neurospora*, 425

**Akawie, Richard I.** See *Hartman, Akawie, and Clark*, 507

**Alivisatos, Spyridon G. A.** See *Kaufman and Alivisatos*, 141

**Allen, Frank Worthington.** See *Crestfield, Smith, and Allen*, 185

**Allen, Thomas H.,** and **Root, Walter S.** Colorimetric determination of carbon monoxide in air by an improved palladium chloride method, 309

— and —. An improved palladium chloride method for the determination of carbon monoxide in blood, 319

B

**Bachhawat, Bimal K., Robinson, William G.,** and **Coon, Minor J.** The enzymatic cleavage of β-hydroxy-β-methylglutaryl coenzyme A to acetoacetate and acetyl coenzyme A, 727

**Balis, M. Earl, Levin, Daniel H.,** and **Luzzati, Denise.** A purine-histidine relationship in *Escherichia coli*, 9

**Ball, Charles D.** See *Byerrum, Ringler, Hamill, and Ball*, 371

**Barnett, Eugene L.** See *Robbins, Barnett, and Grant*, 27

**Barratt, R. W.** See *Adelberg, Coughlin, and Barratt*, 425

**Bates, Norman A.** See *Ukita, Bates, and Carter*, 867

**Baum, Harold.** See *Mahler, Hübscher, and Baum*, 625

**Beck, William S.** A kinetic analysis of the glycolytic rate and certain glycolytic enzymes in normal and leucemic leucocytes, 333

**Benesch, Reinhold.** See *Benesch, Lardy, and Benesch*, 663

**Benesch, Ruth E., Lardy, Henry A.,** and **Benesch, Reinhold.** The sulfhydryl groups of crystalline proteins. I. Some albumins, enzymes, and hemoglobins, 663

**Bergquist, Arloa.** See *Wagner and Bergquist*, 251

**Bloch, Konrad.** See *Reiss and Bloch*, 703

**Blumenthal, Harold J.** See *Lewis, Blumenthal, Weinrach, and Weinhouse*, 273

**Brown, David H.** See *Glaser and Brown*, 67

**Brown, Douglas M.** See *Smith, Brown, McFadden, Buettner-Janusch, and Jager*, 601

**Brumm, Anne F.** See *Karnovsky and Brumm*, 689

**Buettner-Janusch, Vina.** See *Smith, Brown, McFadden, Buettner-Janusch, and Jager*, 601

**Byerrum, Richard U., Ringler, Robert L., Hamill, Robert L.,** and **Ball, Charles D.** Serine and formaldehyde as metabolic precursors for the nicotine *N*-methyl group, 371

C

**Carey, James B., Jr.,** and **Watson, C. J.** Isolation of deoxycholic acid from normal human feces, 847

**Carter, Herbert E.** See *Ukita, Bates, and Carter*, 867

**Cavallini, Doriano, Mondovì, Bruno,** and **De Marco, Carlo.** The isolation of pure hypotaurine from the urine of rats fed cystine, 577

**Chaikoff, I. L.** See *Harold, Jayko, and Chaikoff*, 439

**Cifonelli, Joseph A.** See *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549

**Clark, William G.** See *Hartman, Akawie, and Clark*, 507
**Clarke, Hans T.** The Journal of Biological Chemistry, October, 1905–October, 1955, 449
**Cohen, Seymour S.** See *Lanning and Cohen*, 413
**Cohn, Mildred,** and **Drysdale, George R.** A study with $O^{18}$ of adenosine triphosphate formation in oxidative phosphorylation, 831
**Colmano, Germille.** See *Mahler, Hübscher, and Baum*, 625
**Condliffe, Peter G.** Partition chromatography of oxytocin and vasopressin, 455
**Coon, Minor J.** See *Bachhawat, Robinson, and Coon*, 727
—. See *Rose, Eades, and Coon*, 225
**Cooper, Cecil, Wu, Ray,** and **Wilson, D. Wright.** Studies of some precursors of pyrimidines, 37
**Cori, Carl F.** See *Cowgill and Cori*, 133
**Cormier, Milton J.** See *Totter and Cormier*, 801
**Coughlin, Carroll A.** See *Adelberg, Coughlin, and Barratt*, 425
**Cowgill, Robert W.,** and **Cori, Carl F.** The conversion of inactive phosphorylase to phosphorylase *b* and phosphorylase *a* in lobster muscle extract, 133
**Crestfield, Arthur M., Smith, Kendric C.,** and **Allen, Frank Worthington.** The preparation and characterization of ribonucleic acids from yeast, 185
**Curtin, Constance O'H.,** and **King, C. G.** The metabolism of ascorbic acid-1-$C^{14}$ and oxalic acid-$C^{14}$ in the rat, 539

D

**Davis, John W.** See *Wotiz, Davis, and Lemon*, 677
**Davis, Sidney.** A flame photometric method for the determination of plasma magnesium after hydroxyquinoline precipitation, 643
**De Marco, Carlo.** See *Cavallini, Mondovì, and De Marco*, 577
**Deutsch, H. F.** Purification and physicochemical properties of an unusual Bence-Jones protein, 97
—, and **Diniz, C. R.** Some proteolytic activities of snake venoms, 17
—, **Kratochvil, C. H.,** and **Reif, Arnold E.** Immunochemical relation of Bence-Jones proteins to normal serum proteins, 103
**Diniz, C. R.** See *Deutsch and Diniz*, 17
**Dorfman, Albert, Roseman, Saul, Ludowieg, Julio, Mayeda, Minoru, Moses, Frances E.,** and **Cifonelli, Joseph A.** The biosynthesis of hyaluronic acid by group A streptococcus. IV. Rôle of glucosone as an intermediate in the synthesis of glucosamine, 549
**Drysdale, George R.** See *Cohn and Drysdale*, 831

E

**Eades, Charles H., Jr.** See *Rose, Eades, and Coon*, 225
**Edwards, Sally W.** See *Knox and Edwards*, 479, 489

F

**Farber, Emmanuel,** and **Segaloff, Albert.** Effect of androgens and growth and other hormones on ethionine fatty liver in rats, 471
**Fischer, Edmond H.,** and **Krebs, Edwin G.** Conversion of phosphorylase *b* to phosphorylase *a* in muscle extracts, 121
—. See *Krebs and Fischer*, 113
**Ford, Lillian.** See *Hunter and Ford*, 357
**Freedland, R. A.** See *Hansen and Freedland*, 303
**Friedmann, Bernice.** See *Nakada, Friedmann, and Weinhouse*, 583
**Frohman, Charles E.,** and **Orten, James M.** Tracer studies of the acids of the tricarboxylic acid cycle. I. The fate of labeled acetate in the livers of normal and diabetic rats, 795

G

**Glaser, Luis,** and **Brown, David H.** Purification and properties of D-glucose-6-phosphate dehydrogenase, 67

**Gordon, Edwin E.,** and **Villee, Claude A.** Spectrophotometric studies of the stimulation of human placental preparations by estradiol, 215
—. See *Villee and Gordon*, 203
**Grant, Norman H.** See *Robbins, Barnett, and Grant*, 27
**Greenberg, David M.** See *Pilgeram and Greenberg*, 465
**Grossman, Lawrence,** and **Visser, Donald W.** The isolation of 5,6-dihydrocytidylic acid from the acid-soluble fraction of rat liver slices, 775
**Guthrie, Robert.** See *Luzzati and Guthrie*, 1
**Gutmann, Helmut R.** See *Peters and Gutmann*, 713

H

**Hageman, Elizabeth.** See *Hansen and Freedland*, 303
**Hamill, Robert L.** See *Byerrum, Ringler, Hamill, and Ball*, 371
**Hansen, R. G.,** and **Freedland, R. A.** Lactose metabolism. IV. The function of uridine triphosphate in the interconversion of galactose-1-phosphate and glucose-1-phosphate, 303
**Harold, Franklin M., Jayko, Michael E.,** and **Chaikoff, I. L.** Metabolism of epicholesterol-4-$C^{14}$ in the rat, 439
**Hartman, William J., Akawie, Richard I.,** and **Clark, William G.** Competitive inhibition of 3,4-dihydroxyphenylalanine (dopa) decarboxylase *in vitro*, 507
**Heidelberger, Charles.** See *Leibman and Heidelberger*, 823
**Hill, Robert J.** See *Koeppe and Hill*, 813
**Hofstee, B. H. J.** On the mechanism of inhibition of xanthine oxidase by the substrate xanthine, 235
**Hudson, Perry B.** See *London, Sommer, and Hudson*, 81
**Hübscher, Georg.** See *Mahler, Hübscher, and Baum*, 625
**Hunter, Andrew.** A method of histidine determination based upon a modified Knoop reaction. II, 391
**Hunter, F. Edmund, Jr.,** and **Ford, Lillian.** Inactivation of oxidative and phosphorylative systems in mitochondria by preincubation with phosphate and other ions, 357

J

**Jager, B. V.** See *Smith, Brown, McFadden, Buettner-Janusch, and Jager*, 601
**Jayko, Michael E.** See *Harold, Jayko, and Chaikoff*, 439

K

**Karnovsky, Manfred L.,** and **Brumm, Anne F.** Studies on naturally occurring $\alpha$-glycerol ethers, 689
**Kaufman, Seymour.** Studies on the mechanism of the reaction catalyzed by the phosphorylating enzyme, 153
—, and **Alivisatos, Spyridon G. A.** Purification and properties of the phosphorylating enzyme from spinach, 141
**Kielley, Ruth K.** Purification of liver xanthine oxidase, 405
**King, C. G.** See *Curtin and King*, 539
**Knox, W. Eugene,** and **Edwards, Sally W.** Homogentisate oxidase of liver, 479
— and —. The properties of maleylacetoacetate, the initial product of homogentisate oxidation in liver, 489
**Koeppe, Roger E.,** and **Hill, Robert J.** The incorporation of carboxyl and bicarbonate carbon into glutamic acid by the rat, 813
**Korkes, Seymour.** Enzymatic reduction of pyridine nucleotides by molecular hydrogen, 737
**Kovalenko, Vladimir.** See *Melville, Otken, and Kovalenko*, 325
**Kratochvil, C. H.** See *Deutsch, Kratochvil, and Reif*, 103
**Krebs, Edwin G.,** and **Fischer, Edmond H.** Phosphorylase activity of skeletal muscle extracts, 113
—. See *Fischer and Krebs*, 121

L

**Landers, Roy M., Jr.** See *Vanatta and Landers*, 351

**Lanning, Mary C.**, and **Cohen, Seymour S.** On the origin of deoxyribose in *Escherichia coli* and T6r+ bacteriophage, 413

**Lardy, Henry A.** See *Benesch, Lardy, and Benesch*, 663

**Laster, Leonard.** See *Seegmiller, Laster, and Stetten*, 653

**Laurent, T. C.** Studies on hyaluronic acid in the vitreous body, 263

**Leibman, Kenneth C.**, and **Heidelberger, Charles.** The metabolism of $P^{32}$-labeled ribonucleotides in tissue slices and cell suspensions, 823

**Lemon, Henry M.** See *Wotiz, Davis, and Lemon*, 677

**Levin, Daniel H.** See *Balis, Levin, and Luzzati*, 9

**Levinthal, Jeana.** See *Tsao and Sloan*, 165

**Lewis, Katherine F., Blumenthal, Harold J., Weinrach, Roy S.**, and **Weinhouse, Sidney.** An isotope tracer study of glucose catabolism in *Pseudomonas fluorescens*, 273

**London, Morris, Sommer, Armin**, and **Hudson, Perry B.** Further studies on the purification of prostatic acid phosphatase, 81

**Ludowieg, Julio.** See *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549

**Luzzati, Denise**, and **Guthrie, Robert.** Studies of a purine- or histidine-requiring mutant of *Escherichia coli*, 1

—. See *Balis, Levin, and Luzzati*, 9

M

**Mahler, H. R., Hübscher, Georg**, and **Baum, Harold.** Studies on uricase. I. Preparation, purification, and properties of a cuproprotein, 625

**Mayeda, Minoru.** See *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549

**McFadden, Mary L.**, and **Smith, Emil L.** Free amino groups of equine γ-globulins and a specific antibody, 621

—. See *Smith, Brown, McFadden, Buettner-Janusch, and Jager*, 601

**Meinhart, Josephine O.**, and **Simmonds, Sofia.** Metabolism of serine and glycine peptides by mutants of *Escherichia coli* strain K-12, 51

**Melville, Donald B., Otken, Charles C.**, and **Kovalenko, Vladimir.** On the origin of animal ergothioneine, 325

**Mondovì, Bruno.** See *Cavallini, Mondovì, and De Marco*, 577

**Moses, Frances E.** See *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549

N

**Nakada, Henry I., Friedmann, Bernice**, and **Weinhouse, Sidney.** Pathways of glycine catabolism in rat liver, 583

O

**Orten, James M.** See *Frohman and Orten*, 795

**Otken, Charles C.** See *Melville, Otken, and Kovalenko*, 325

P

**Pazur, John H.** Reversibility of enzymatic transglucosylation reactions, 531

**Peters, John H.**, and **Gutmann, Helmut R.** The acetylation of 2-aminofluorene and the deacetylation and concurrent reacetylation of 2-acetylaminofluorene by rat liver slices, 713

**Pilgeram, Laurence O.**, and **Greenberg, David M.** Chromatographic identification of bound glutamic acid in the phosphatide fraction from liver, 465

**Pontis, Horacio G.** Uridine diphosphate acetylgalactosamine in liver, 195

R

**Reif, Arnold E.** See *Deutsch, Kratochvil, and Reif*, 103

**Reinfranck, Phyllis.** See *Robbins, Barnett, and Grant*, 27

**Reiss, Oscar**, and **Bloch, Konrad.** Studies on leucine biosynthesis in yeast, 703

**Ringler, Robert L.** See *Byerrum, Ringler, Hamill, and Ball*, 371
**Robbins, Kenneth C., Barnett, Eugene L.,** and **Grant, Norman H.** Partial purification of porcine liver uricase, 27
**Robinson, William G.** See *Bachhawat, Robinson, and Coon*, 727
**Root, Walter S.** See *Allen and Root*, 309, 319
**Rose, William C., Eades, Charles H., Jr.,** and **Coon, Minor J.** The amino acid requirements of man. XII. The leucine and isoleucine requirements, 225
— and **Wixom, Robert L.** The amino acid requirements of man. XIII. The sparing effect of cystine on the methionine requirement, 763
**Roseman, Saul.** See *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549

S

**Schneider, Walter C.** Deoxyribosides in animal tissues, 287
**Seegmiller, J. E., Laster, Leonard,** and **Stetten, DeWitt, Jr.** Incorporation of 4-amino-5-imidazolecarboxamide-4-$C^{13}$ into uric acid in the normal human, 653
**Segaloff, Albert.** See *Farber and Segaloff*, 471
**Simmonds, Sofia.** See *Meinhart and Simmonds*, 51
**Simpson, Melvin V.** Further studies on the biosynthesis of aldolase and glyceraldehyde-3-phosphate dehydrogenase, 179
**Sinex, F. Marott,** and **Van Slyke, Donald D.** The source and state of the hydroxylysine of collagen, 245
**Sloan, Charles H.** See *Tsao and Sloan*, 165
**Smith, Emil L., Brown, Douglas M., McFadden, Mary L., Buettner-Janusch, Vina,** and **Jager, B. V.** Physical, chemical, and immunological studies on globulins from multiple myeloma, 601
—. See *McFadden and Smith*, 621
**Smith, Kendric.** See *Crestfield, Smith, and Allen*, 185
**Sommer, Armin.** See *London, Sommer, and Hudson*, 81
**Stetten, DeWitt, Jr.** See *Seegmiller, Laster, and Stetten*, 653
**Sutton, W. B.** Sulfhydryl and prosthetic groups of lactic oxidative decarboxylase from *Mycobacterium phlei*, 749

T

**Titus, Elwood.** See *Udenfriend, Titus, and Weissbach*, 499
**Totter, John R.,** and **Cormier, Milton J.** The relation of bacterial luciferase to alternative pathways of dihydroflavin mononucleotide oxidation, 801
**Tsao, Makepeace U.,** and **Sloan, Charles H.** Polarographic determination of oxygen tension of whole blood, 165
**Tyler, David B.** Effect of metal ions and adenosine triphosphate on an oxalacetate-inhibited succinoxidase activity, 395

U

**Udenfriend, Sidney, Titus, Elwood,** and **Weissbach, Herbert.** The identification of 5-hydroxy-3-indoleacetic acid in normal urine and a method for its assay, 499
**Ukita, Tyunosin, Bates, Norman A.,** and **Carter, Herbert E.** Studies on the alkaline hydrolysis of lecithin: synthesis of cyclic 1,2-glycerophosphate, 867

V

**Vanatta, John C.,** and **Landers, Roy M., Jr.** The determination of total base of urine with an ion exchange resin conditioned as iodate, 351
**Van Slyke, Donald D.** See *Sinex and Van Slyke*, 245
**Villee, Claude A.,** and **Gordon, Edwin E.** Further studies on the action of estradiol *in vitro*, 203
—. See *Gordon and Villee*, 215
**Vincent, T. N.** See *Wilson and Vincent*, 851

**Visser, Donald W.** See *Grossman and Visser*, 775

W

**Wagner, R. P.**, and **Bergquist, Arloa.** The accumulation of keto acids and acetaldehyde by a strain of *Neurospora* inhibited by threonine, 251

**Wainio, W. W.** Reduction of cytochrome oxidase with ferrocytochrome *c*, 593

**Watson, C. J.** See *Carey and Watson*, 847

**Weinhouse, Sidney.** See *Lewis, Blumenthal, Weinrach, and Weinhouse*, 273

—. See *Nakada, Friedmann, and Weinhouse*, 583

**Weinrach, Roy S.** See *Lewis, Blumenthal, Weinrach, and Weinhouse*, 273

**Weissbach, Herbert.** See *Udenfriend, Titus, and Weissbach*, 499

**Weissmann, Bernard.** The transglycosylative action of testicular hyaluronidase, 783

**Wilson, D. Wright.** See *Cooper, Wu, and Wilson*, 37

**Wilson, T. H.**, and **Vincent, T. N.** Absorption of sugars *in vitro* by the intestine of the golden hamster, 851

**Wittenberg, Jonathan B.** The separation of sphingosine and related compounds by reversed phase partition chromatography, 379

**Wixom, Robert L.** See *Rose and Wixom*, 763

**Wotiz, Herbert H., Davis, John W.**, and **Lemon, Henry M.** Steroid biosynthesis by surviving testicular tumor tissue, 677

**Wu, Ray.** See *Cooper, Wu, and Wilson*, 37

Z

**Zelitch, Israel.** The isolation and action of crystalline glyoxylic acid reductase from tobacco leaves. 553

# INDEX TO SUBJECTS

A

**Acetaldehyde:** *Neurospora*, threonine-inhibited, *Wagner and Bergquist*, 251

**Acetate:** Fate, liver, diabetes, *Frohman and Orten*, 795

Oxal-. *See* Oxalacetate

**Acetic acid:** 5-Hydroxy-3-indole-. *See* Hydroxy-3-indoleacetic acid

**Acetoacetate:** β-Hydroxy-β-methylglutaryl coenzyme A conversion to, enzymatic, *Bachhawat, Robinson, and Coon*, 727

Maleyl-. *See* Maleylacetoacetate

**Acetylaminofluorene:** 2-, deacetylation and reacetylation, liver, *Peters and Gutmann*, 713

**Acetyl coenzyme A:** β-Hydroxy-β-methylglutaryl coenzyme A conversion to, enzymatic, *Bachhawat, Robinson, and Coon*, 727

**Adenosine triphosphate:** Formation, phosphorylation, oxidative, isotopic oxygen use, *Cohn and Drysdale*, 831

Succinoxidase, oxalacetate-inhibited, effect, *Tyler*, 395

**Air:** Carbon monoxide determination, colorimetric, *Allen and Root*, 309

**Albumin(s):** Sulfhydryl groups, *Benesch, Lardy, and Benesch*, 663

**Aldolase:** Biosynthesis, *Simpson*, 179

**Amino acid:** Requirements, *Rose, Eades, and Coon*, 225
*Rose and Wixom*, 763

**Aminofluorene:** 2-, acetylation, liver, *Peters and Gutmann*, 713

**Amino group(s):** Free, antibody, specific, *McFadden and Smith*, 621

—, γ-globulins, *McFadden and Smith*, 621

**Amino-5-imidazolecarboxamide:** Carbon 13-labeled, incorporation into uric acid, *Seegmiller, Laster, and Stetten*, 653

**Androgen(s):** Ethionine fatty liver, effect, *Farber and Segaloff*, 471

**Antibody:** Specific, amino groups, free, *McFadden and Smith*, 621

**Ascorbic acid:** Carbon 14-labeled, metabolism, *Curtin and King*, 539

B

**Bacteria:** Luciferase, dihydroflavin mononucleotide oxidation, relation, *Totter and Cormier*, 801

*See also Escherichia, Mycobacterium, Pseudomonas, Streptococcus*

**Bacteriophage:** T6r+, deoxyribose, origin, *Lanning and Cohen*, 413

**Base:** Total, urine, determination, *Vanatta and Landers*, 351

**Bence-Jones:** Protein, purification and properties, *Deutsch*, 97

Proteins, blood serum proteins, immunochemical relation, *Deutsch, Kratochvil, and Reif*, 103

**Blood:** Carbon monoxide determination, *Allen and Root*, 319

Oxygen tension determination, polarographic, *Tsao and Sloan*, 165

**Blood cell:** White, leucemia, glycolytic rate and enzymes, *Beck*, 333

**Blood plasma:** Magnesium, determination, *Davis*, 643

**Blood serum:** Proteins, Bence-Jones proteins, immunochemical relation, *Deutsch, Kratochvil, and Reif*, 103

C

**Cancer:** *See also* Myeloma, Tumor

**Carbon monoxide:** Air, determination, colorimetric, *Allen and Root*, 309

Blood, determination, *Allen and Root*, 319

**Carboxylic acid:** Tri-. *See* Tricarboxylic acid

**Cholesterol:** Epi-. *See* Epicholesterol

**Cholic acid:** Deoxy-. *See* Deoxycholic acid

**Coenzyme:** A, acetyl. *See* Acetyl coenzyme A
—, β-hydroxy-β-methylglutaryl. *See* Hydroxy-β-methylglutaryl coenzyme A
**Collagen:** Hydroxylysine, source and nature, *Sinex and Van Slyke*, 245
**Cuproprotein:** Uricase relation, *Mahler, Hübscher, and Baum*, 625
**Cystine:** -Fed rats, urine hypotaurine isolation, *Cavallini, Mondovì, and De Marco*, 577
Methionine requirement, effect, *Rose and Wixom*, 763
**Cytidylic acid:** 5,6-Dihydro-. *See* Dihydrocytidylic acid
**Cytochrome:** Ferro-. *See* Ferrocytochrome
**Cytochrome oxidase:** Ferrocytochrome *c*, effect, *Wainio*, 593

D

**Decarboxylase:** 3,4-Dihydroxyphenylalanine. *See* Dihydroxyphenylalanine decarboxylase
Lactic oxidative. *See* Lactic oxidative decarboxylase
**Dehydrogenase:** D-Glucose-6-phosphate. *See* Glucose-6-phosphate dehydrogenase
Glyceraldehyde - 3 - phosphate. *See* Glyceraldehyde-3-phosphate dehydrogenase
**Deoxycholic acid:** Feces, isolation, *Carey and Watson*, 847
**Deoxyribose:** Bacteriophage T6r+, origin, *Lanning and Cohen*, 413
*Escherichia coli*, origin, *Lanning and Cohen*, 413
**Deoxyriboside(s):** Tissue, *Schneider*, 287
**Diabetes:** Liver acetate fate, *Frohman and Orten*, 795
**Dihydrocytidylic acid:** 5,6-, liver acid-soluble fraction, isolation, *Grossman and Visser*, 775
**Dihydroflavin mononucleotide:** Oxidation, bacterial luciferase relation, *Totter and Cormier*, 801
**Dihydroxyphenylalanine decarboxylase:** 3,4-, competitive inhibition, *Hartman, Akawie, and Clark*, 507

E

**Enzyme(s):** Glycolytic, leucocytes, leucemia, *Beck*, 333
β-Hydroxy-β-methylglutaryl coenzyme A conversion to acetoacetate and acetyl coenzyme A, *Bachhawat, Robinson, and Coon*, 727
Phosphorylating. *See* Phosphorylating enzyme
Pyridine nucleotide reduction, hydrogen effect, *Korkes*, 737
Sulfhydryl groups, *Benesch, Lardy, and Benesch*, 663
Transglucosylation reactions, *Pazur*, 531
*See also* Aldolase, Cytochrome oxidase, etc.
**Epicholesterol:** Carbon 14-labeled, metabolism, *Harold, Jayko, and Chaikoff*, 439
**Ergothioneine:** Animal, origin, *Melville, Otken, and Kovalenko*, 325
**Escherichia coli:** Deoxyribose, origin, *Lanning and Cohen*, 413
Mutant, histidine-requiring, *Luzzati and Guthrie*, 1
—, purine-requiring, *Luzzati and Guthrie*, 1
Mutants, serine and glycine peptides, metabolism, *Meinhart and Simmonds*, 51
Purine-histidine relationship, *Balis, Levin, and Luzzati*, 9
**Estradiol:** Action, *in vitro*, *Villee and Gordon*, 203
Placenta, effect, *Gordon and Villee*, 215
**Ether(s):** α-Glycerol. *See* Glycerol ether
**Ethionine:** Fatty liver, androgens and growth and other hormones, effect, *Farber and Segaloff*, 471

F

**Fat:** Liver, ethionine, androgens and growth and other hormones, effect, *Farber and Segaloff*, 471

**Feces:** Deoxycholic acid isolation, *Carey and Watson*, 847
**Ferrocytochrome:** *c*, cytochrome oxidase, effect, *Wainio*, 593
**Fluorene:** 2-Acetylamino-. *See* Acetylaminofluorene
2-Amino-. *See* Aminofluorene
**Formaldehyde:** Nicotine *N*-methyl group, as precursor, *Byerrum, Ringler, Hamill, and Ball*, 371

G

**Galactosamine:** Uridine diphosphate acetyl-. *See* Uridine diphosphate acetylgalactosamine
**Galactose-1-phosphate:** Glucose-1-phosphate interconversion, uridine triphosphate effect, *Hansen and Freedland*, 303
**Globulin(s):** γ-, amino groups, free, *McFadden and Smith*, 621
Myeloma, multiple, *Smith, Brown, McFadden, Buettner-Janusch, and Jager*, 601
**Glucosamine:** Hyaluronic acid biosynthesis by streptococcus group A, relation, *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549
**Glucose:** Catabolism, *Pseudomonas fluorescens*, isotope tracer use, *Lewis, Blumenthal, Weinrach, and Weinhouse*, 273
**Glucose-1-phosphate:** Galactose-1-phosphate interconversion, uridine triphosphate effect, *Hansen and Freedland*, 303
**Glucose-6-phosphate dehydrogenase:** D-, purification and properties, *Glaser and Brown*, 67
**Glucosone:** Hyaluronic acid biosynthesis by streptococcus group A, relation, *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549
**Glutamic acid:** Bound, liver phosphatide, identification, chromatographic, *Pilgeram and Greenberg*, 465
**Glutamic acid**—*continued:*
Carboxyl and bicarbonate carbon, incorporation into, *in vivo*, *Koeppe and Hill*, 813
**Glyceraldehyde-3-phosphate dehydrogenase:** Biosynthesis, *Simpson*, 179
**Glycerol ether(s):** α-, *Karnovsky and Brumm*, 689
**Glycerophosphate:** 1,2-, cyclic, synthesis, *Ukita, Bates, and Carter*, 867
**Glycine:** Catabolism, liver, *Nakada, Friedmann, and Weinhouse*, 583
Peptides, metabolism, *Escherichia coli* mutants, *Meinhart and Simmonds*, 51
**Glycolysis:** Enzymes and rate, leucocytes, leucemia, *Beck*, 333
**Glyoxylic acid reductase:** Tobacco leaves, isolation and action, *Zelitch*, 553
**Growth:** Hormone, ethionine fatty liver, effect, *Farber and Segaloff*, 471

H

**Hemoglobin(s):** Sulfhydryl groups, *Benesch, Lardy, and Benesch*, 663
**Histidine:** Determination, Knoop reaction, use, *Hunter*, 391
-Purine relationship, *Escherichia coli, Balis, Levin, and Luzzati*, 9
-Requiring mutant, *Escherichia coli, Luzzati and Guthrie*, 1
**Homogentisate:** Oxidation, liver, maleylacetoacetate, *Knox and Edwards*, 489
**Homogentisate oxidase:** Liver, *Knox and Edwards*, 479
**Hormone(s):** Ethionine fatty liver, effect, *Farber and Segaloff*, 471
**Hyaluronic acid:** Biosynthesis, streptococcus group A, *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549
—, — — —, glucosone and glucosamine relation, *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549
Vitreous body, *Laurent*, 263

**Hyaluronidase:** Testis, transglycosylative action, *Weissmann*, 783
**Hydrogen:** Pyridine nucleotide reduction, enzymatic, effect, *Korkes*, 737
**Hydroxy-3-indoleacetic acid:** 5-, urine, identification and determination, *Udenfriend, Titus, and Weissbach*, 499
**Hydroxylysine:** Collagen, source and nature, *Sinex and Van Slyke*, 245
**Hydroxy-β-methylglutaryl coenzyme A:** β-, acetoacetate and acetyl coenzyme A from, enzymatic cleavage, *Bachhawat, Robinson, and Coon*, 727
**Hypotaurine:** Urine, isolation, cystine-fed rats, *Cavallini, Mondovì, and De Marco*, 577

I

**Intestine:** Sugar absorption, *in vitro*, *Wilson and Vincent*, 851
**Isoleucine:** Biosynthesis, *Adelberg, Coughlin, and Barratt*, 425
*Adelberg*, 431
—, *Neurospora*, *Adelberg, Coughlin, and Barratt*, 425
—, L-threonine relation, *Adelberg*, 431
Requirement, *Rose, Eades, and Coon*, 225

J

**Journal of Biological Chemistry, 1905–55:** *Clarke*, 449

K

**Keto acid(s):** *Neurospora*, threonine-inhibited, *Wagner and Bergquist*, 251

L

**Lactic oxidative decarboxylase:** Sulfhydryl and prosthetic groups, *Mycobacterium phlei, Sutton*, 749
**Lactose:** Metabolism, *Hansen and Freedland*, 303
**Lecithin:** Hydrolysis, alkaline, *Ukita, Bates, and Carter*, 867
**Leucemia:** Leucocytes, glycolytic rate and enzymes, *Beck*, 333
**Leucine:** Biosynthesis, yeast, *Reiss and Bloch*, 703
Iso-. *See* Isoleucine
Requirement, *Rose, Eades, and Coon*, 225
**Leucocyte:** *See* Blood cell, white
**Liver:** Acetate, fate, diabetes, *Frohman and Orten*, 795
2-Acetylaminofluorene deacetylation and reacetylation, *Peters and Gutmann*, 713
Acid-soluble fraction, 5,6-dihydrocytidylic acid, isolation, *Grossman and Visser*, 775
2-Aminofluorene acetylation, *Peters and Gutmann*, 713
Ethionine fatty, androgens and growth and other hormones, effect, *Farber and Segaloff*, 471
Glycine catabolism, *Nakada, Friedmann, and Weinhouse*, 583
Homogentisate oxidase, *Knox and Edwards*, 479
— oxidation, maleylacetoacetate, *Knox and Edwards*, 489
Phosphatide, glutamic acid, bound, identification, chromatographic, *Pilgeram and Greenberg*, 465
Uricase, purification, *Robbins, Barnett, and Grant*, 27
Uridine diphosphate acetylgalactosamine, *Pontis*, 195
Xanthine oxidase, purification, *Kielley*, 405
**Lobster:** Muscle, phosphorylase conversion to phosphorylases *b* and *a*, *Cowgill and Cori*, 133
**Luciferase:** Bacteria, dihydroflavin mononucleotide oxidation, relation, *Totter and Cormier*, 801
**Lysine:** Hydroxy-. *See* Hydroxylysine

M

**Magnesium:** Blood plasma, determination, *Davis*, 643
**Maleylacetoacetate:** Homogentisate oxidation, liver, *Knox and Edwards*, 489
**Metal ion(s):** Succinoxidase, oxalacetate-inhibited, effect, *Tyler* 395

**Methionine:** Requirement, cystine effect, *Rose and Wixom*, 763
**Methyl group:** *N*-, nicotine, serine and formaldehyde as precursors, *Byerrum, Ringler, Hamill, and Ball*, 371
**Mitochondrion:** Oxidative and phosphorylative systems, phosphate ions, effect, *Hunter and Ford*, 357
**Mold:** *See also Neurospora*
**Muscle:** Lobster, phosphorylase conversion to phosphorylases *b* and *a*, *Cowgill and Cori*, 133
Phosphorylase, *Krebs and Fischer*, 113
— *b* conversion to phosphorylase *a*, *Fischer and Krebs*, 121
**Mycobacterium phlei:** Lactic oxidative decarboxylase sulfhydryl and prosthetic groups, *Sutton*, 749
**Myeloma:** Multiple, globulins, *Smith, Brown, McFadden, Buettner-Janusch, and Jager*, 601
*See also* Tumor

N

**Neurospora:** Isoleucine biosynthesis, *Adelberg, Coughlin, and Barratt*, 425
Threonine-inhibited, keto acids and acetaldehyde, *Wagner and Bergquist*, 251
Valine biosynthesis, *Adelberg, Coughlin, and Barratt*, 425
**Nicotine:** *N*-Methyl group, serine and formaldehyde as precursors, *Byerrum, Ringler, Hamill, and Ball*, 371
**Nucleic acid(s):** Ribo-. *See* Ribonucleic acid
**Nucleotide(s):** Pyridine. *See* Pyridine nucleotide
Ribo-. *See* Ribonucleotide

O

**Oxalacetate:** -Inhibited succinoxidase, metal ions, effect, *Tyler*, 395
**Oxalic acid:** Carbon 14-labeled, metabolism, *Curtin and King*, 539
**Oxidase:** Cytochrome. *See* Cytochrome oxidase
**Oxidase**—*continued:*
Homogentisate. *See* Homogentisate oxidase
Succin-. *See* Succinoxidase
Xanthine. *See* Xanthine oxidase
**Oxidative system:** Mitochondria, phosphate ion, effect, *Hunter and Ford*, 357
**Oxygen:** Tension, blood, determination, polarographic, *Tsao and Sloan*, 165
**Oxytocin:** Chromatography, partition, *Condliffe*, 455

P

**Peptide(s):** Glycine, metabolism, *Escherichia coli* mutants, *Meinhart and Simmonds*, 51
Serine, metabolism, *Escherichia coli* mutants, *Meinhart and Simmonds*, 51
**Phosphatase:** Prostatic acid, purification, *London, Sommer, and Hudson*, 81
**Phosphate ion(s):** Mitochondria, oxidative and phosphorylative systems, effect, *Hunter and Ford*, 357
**Phosphatide:** Liver, glutamic acid, bound, identification, chromatographic, *Pilgeram and Greenberg*, 465
**Phosphorylase:** *a* from phosphorylase, lobster muscle effect, *Cowgill and Cori*, 133
— — — *b*, muscle effect, *Fischer and Krebs*, 121
*b*, conversion to phosphorylase *a*, muscle effect, *Fischer and Krebs*, 121
— from phosphorylase, lobster muscle effect, *Cowgill and Cori*, 133
Muscle, *Krebs and Fischer*, 113
Phosphorylases *b* and *a* from, lobster muscle effect, *Cowgill and Cori*, 133
**Phosphorylating enzyme:** Reaction mechanism, *Kaufman*, 153
Spinach, purification and properties, *Kaufman and Alivisatos*, 141

**Phosphorylation:** Oxidative, adenosine triphosphate formation, isotopic oxygen use, *Cohn and Drysdale*, 831
**Phosphorylative system:** Mitochondria, phosphate ion, effect, *Hunter and Ford*, 357
**Placenta:** Estradiol effect, *Gordon and Villee*, 215
**Prostatic acid:** Phosphatase, purification, *London, Sommer, and Hudson*, 81
**Prosthetic group(s):** Lactic oxidative decarboxylase, *Mycobacterium phlei, Sutton*, 749
**Protein(s):** Bence-Jones, blood serum proteins, immunochemical relation, *Deutsch, Kratochvil, and Reif*, 103
—, purification and properties, *Deutsch*, 97
Cupro-. *See* Cuproprotein
Sulfhydryl groups, *Benesch, Lardy, and Benesch*, 663
**Proteolysis:** Snake venoms, *Deutsch and Diniz*, 17
**Pseudomonas fluorescens:** Glucose catabolism, isotope tracer use, *Lewis, Blumenthal, Weinrach, and Weinhouse*, 273
**Purine:** -Histidine relationship, *Escherichia coli, Balis, Levin, and Luzzati*, 9
-Requiring mutant, *Escherichia coli, Luzzati and Guthrie*, 1
**Pyridine nucleotide(s):** Reduction, enzymatic, hydrogen effect, *Korkes*, 737
**Pyrimidine(s):** Precursors, *Cooper, Wu, and Wilson*, 37

R

**Reductase:** Glyoxylic acid. *See* Glyoxylic acid reductase
**Ribonucleic acid(s):** Yeast, preparation and characterization, *Crestfield, Smith, and Allen*, 185
**Ribonucleotide(s):** Phosphorus 32-labeled, metabolism, *Leibman and Heidelberger*, 823
**Ribose:** Deoxy-. *See* Deoxyribose
**Riboside(s):** Deoxy-. *See* Deoxyriboside

S

**Serine:** Nicotine *N*-methyl group, as precursor, *Byerrum, Ringler, Hamill, and Ball*, 371
Peptides, metabolism, *Escherichia coli* mutants, *Meinhart and Simmonds*, 51
**Snake:** Venoms, proteolysis, *Deutsch and Diniz*, 17
**Sphingosine:** -Related compounds, separation, chromatography, partition, *Wittenberg*, 379
Separation, chromatography, partition, *Wittenberg*, 379
**Spinach:** Enzyme, phosphorylating, purification and properties, *Kaufman and Alivisatos*, 141
**Steroid:** Biosynthesis, testis tumor, *Wotiz, Davis, and Lemon*, 677
**Streptococcus:** Group A, hyaluronic acid biosynthesis, *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549
— —, — — biosynthesis, glucosone and glucosamine relation, *Dorfman, Roseman, Ludowieg, Mayeda, Moses, and Cifonelli*, 549
**Succinoxidase:** Oxalacetate-inhibited, metal ions, effect, *Tyler*, 395
**Sugar(s):** Absorption, intestine, *in vitro, Wilson and Vincent*, 851
**Sulfhydryl group(s):** Albumins, *Benesch, Lardy, and Benesch*, 663
Enzymes, *Benesch, Lardy, and Benesch*, 663
Hemoglobins, *Benesch, Lardy, and Benesch*, 663
Lactic oxidative decarboxylase, *Mycobacterium phlei, Sutton*, 749
Proteins, *Benesch, Lardy, and Benesch*, 663

T

**Taurine:** Hypo-. *See* Hypotaurine
**Testis:** Hyaluronidase, transglycosylative action, *Weissmann*, 783
Tumor, steroid biosynthesis, *Wotiz, Davis, and Lemon*, 677

**Threonine:** -Inhibited *Neurospora*, keto acids and acetaldehyde, *Wagner and Bergquist*, 251
L-, isoleucine biosynthesis, relation, *Adelberg*, 431
—, valine biosynthesis, relation, *Adelberg*, 431
**Tobacco:** Leaves, glyoxylic acid reductase, isolation and action, *Zelitch*, 553
**Transglucosylation:** Enzyme, reactions, *Pazur*, 531
**Transglycosylation:** Testis hyaluronidase, *Weissmann*, 783
**Tricarboxylic acid:** Cycle, acids, *Frohman and Orten*, 795
**Tumor:** Testis, steroid biosynthesis, *Wotiz, Davis, and Lemon*, 677
*See also* Myeloma

U

**Uric acid:** 4-Amino-5-imidazolecarboxamide-4-$C^{13}$ incorporation into, *Seegmiller, Laster, and Stetten*, 653
**Uricase:** Cuproprotein relation, *Mahler, Hübscher, and Baum*, 625
Liver, purification, *Robbins, Barnett, and Grant*, 27
**Uridine diphosphate acetylgalactosamine:** Liver, *Pontis*, 195
**Uridine triphosphate:** Galactose-1-phosphate and glucose-1-phosphate, interconversion, effect, *Hansen and Freedland*, 303
**Urine:** Base, total, determination, *Vanatta and Landers*, 351
**Urine**—*continued:*
5-Hydroxy-3-indoleacetic acid, identification and determination, *Udenfriend, Titus, and Weissbach*, 499
Hypotaurine, isolation, cystine-fed rats, *Cavallini, Mondovì, and De Marco*, 577

V

**Valine:** Biosynthesis, *Adelberg, Coughlin, and Barratt*, 425
*Adelberg*, 431
—, *Neurospora*, *Adelberg, Coughlin, and Barratt*, 425
—, L-threonine relation, *Adelberg*, 431
**Vasopressin:** Chromatography, partition, *Condliffe*, 455
**Venom(s):** Snake, proteolysis, *Deutsch and Diniz*, 17
**Vitamin:** C. *See also* Ascorbic acid
**Vitreous body:** Hyaluronic acid, *Laurent*, 263

X

**Xanthine:** Xanthine oxidase, effect, *Hofstee*, 235
**Xanthine oxidase:** Liver, purification, *Kielley*, 405
Xanthine effect, *Hofstee*, 235

Y

**Yeast:** Leucine biosynthesis, *Reiss and Bloch*, 703
Ribonucleic acids, preparation and characterization, *Crestfield, Smith, and Allen*, 185
